CRIANDO UM REPOSITÓRIO NO GITHUB:

1. Após fazer login, clique no botão New (Novo) no canto superior esquerdo da tela.

2. Escolha um nome para o repositório.
3. Público ou privado é de acordo com o seu projeto)
4. Adicione um README file para incluir uma breve descrição do projeto)
5. Clique em Create repository (Criar repositório).

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner * Eberrth44 /

Great repository names are short and memorable. Need inspiration? How about [laughing-octo-sniffle](#) ?

Description (optional)

- ☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.
- ☐  **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

- ☐ Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

 You are creating a public repository in your personal account.

Create repository

1. FAZENDO LOGIN NO GITHUB DESKTOP

2. Ao abrir o GitHub Desktop, clique em Sign in to GitHub.com.
3. Insira suas credenciais e clique em Sign in.
4. Autorize o aplicativo para acessar sua conta do GitHub.
5. Após o login, você verá a tela inicial do GitHub Desktop.

Criando um repositório

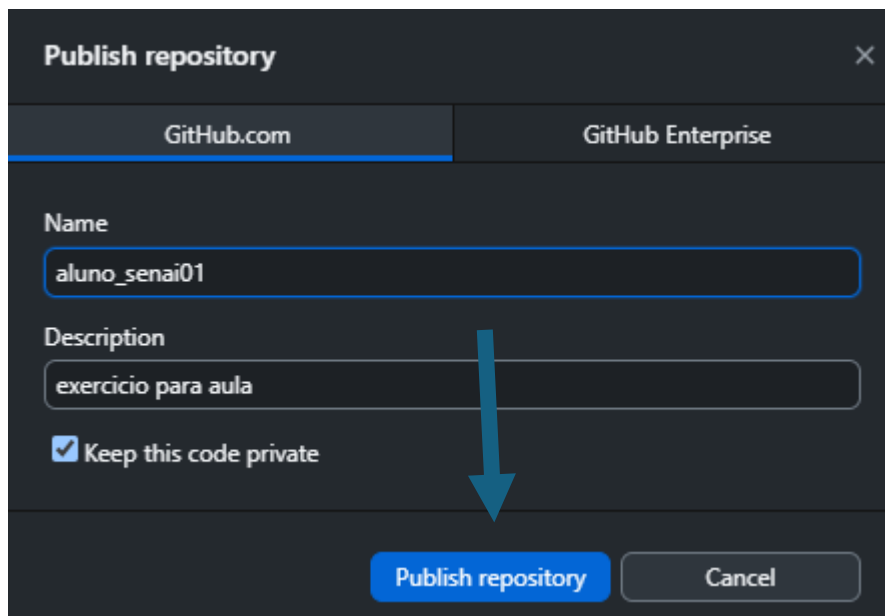

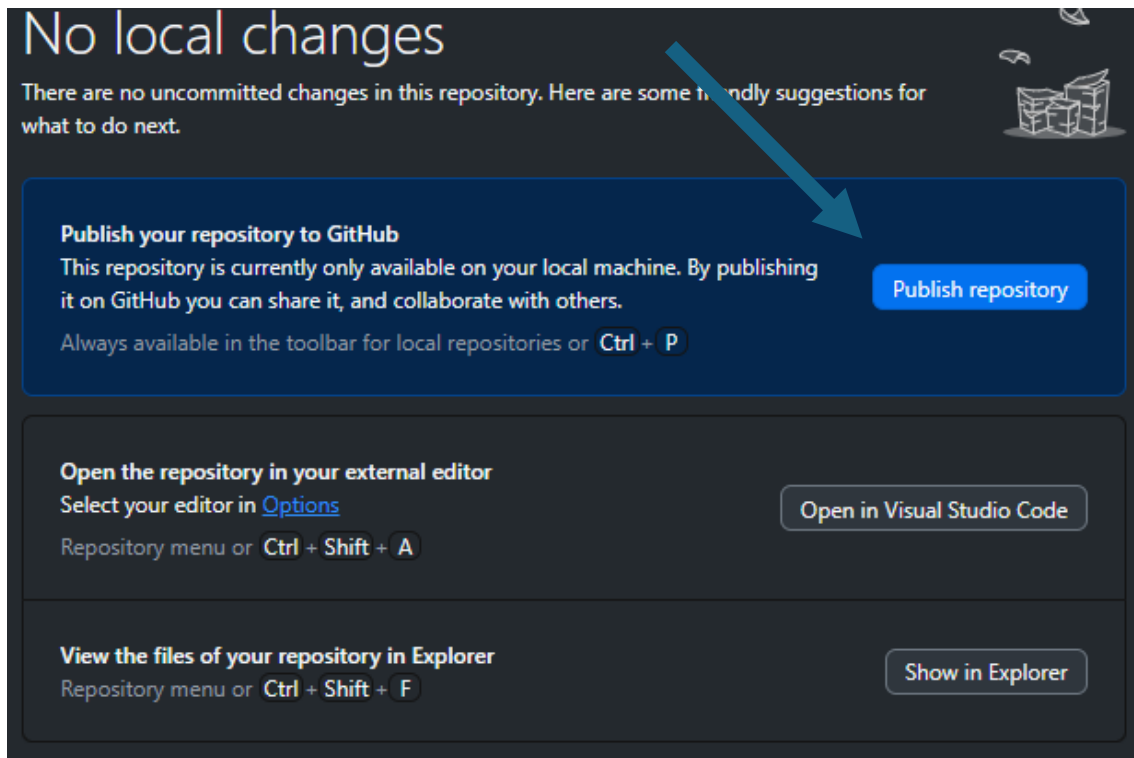

1. Clique em create new repository para criar um repositório.

2. Adicione as informações.
3. Clique em create repository para criar o repositório.

A screenshot of the 'Create a new repository' dialog box in GitHub Desktop. The dialog has a title bar with a close button. It contains several input fields: 'Name' with the placeholder text 'repository name', 'Description', and 'Local path' with the value 'C:\Users\eberth_rodrigues\Documents\GitHub' and a 'Choose...' button. There is a checkbox for 'Initialize this repository with a README' which is unchecked. Below this are two dropdown menus for 'Git ignore' (set to 'None') and 'License' (set to 'None'). At the bottom, there are two buttons: 'Create repository' (highlighted in blue) and 'Cancel'. A blue arrow points from the 'Create repository' button in the previous step to this button.

A opção "Publish Repository" no GitHub Desktop serve para enviar o seu repositório local para o GitHub, tornando-o acessível online para compartilhamento e colaboração.

USANDO O BRANCH NO GITHUB

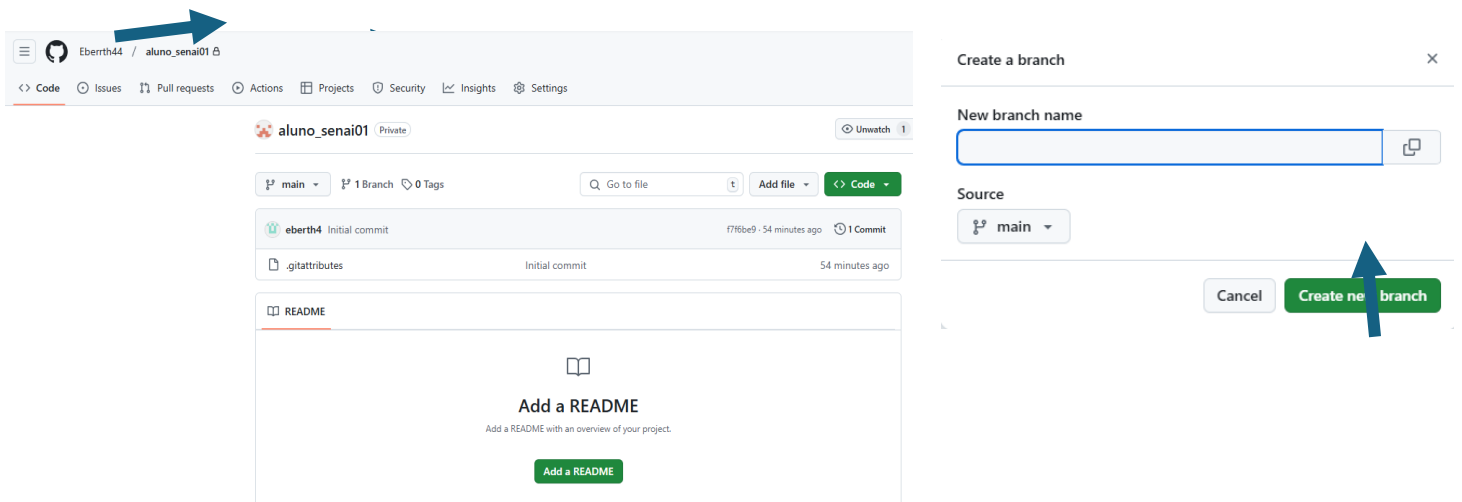

O que é um Branch?

Branch (ou ramo) é uma cópia do código principal onde mudanças podem ser feitas sem afetar o projeto original.

Criando um Branch no GitHub Online:

(verifique se você está na sua conta criado no desktop)

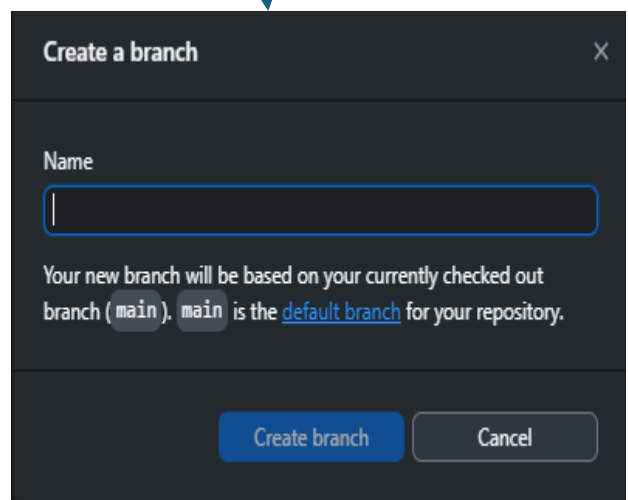

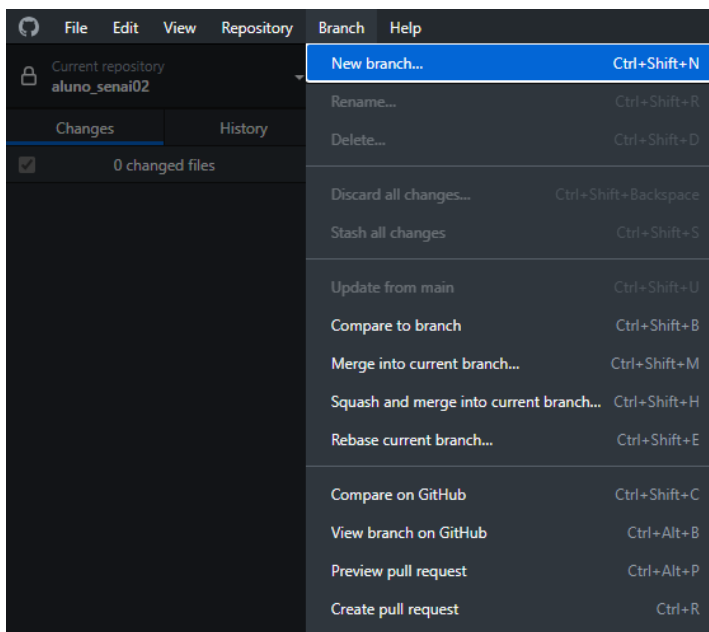

- Passo 1: Acesse o repositório no GitHub Online.
- Passo 2: Clique no menu "Branch" e selecione "New branch".
- Passo 3: Nomeie o novo branch e clique em "Create branch".

Criando um Branch no GitHub Desktop:

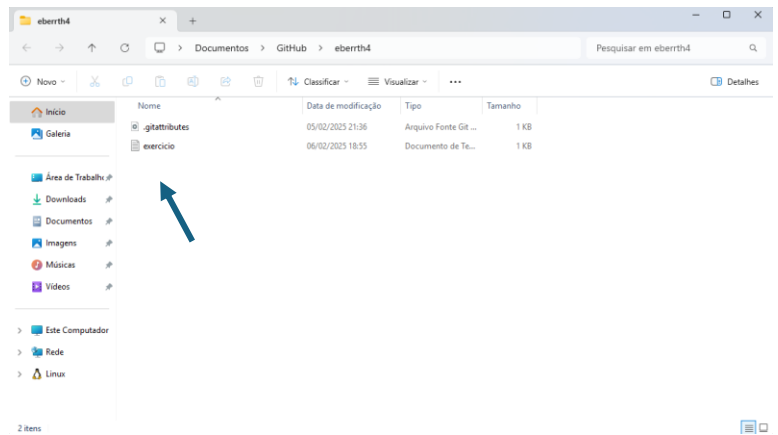

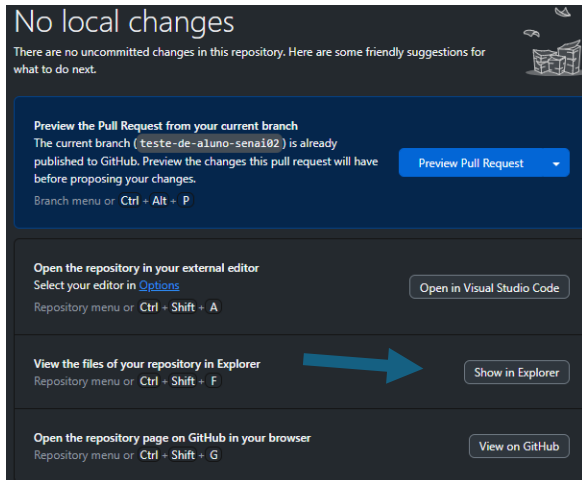

- Passo 1: Abra o GitHub Desktop.
- Passo 2: Selecione o repositório no qual deseja criar o branch.
- Passo 3: No menu "Branch", selecione "New Branch".
- Passo 4: Nomeie o branch e clique em "Create Branch".

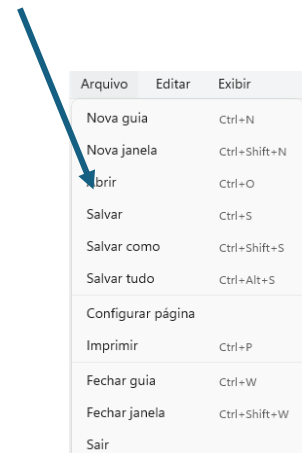

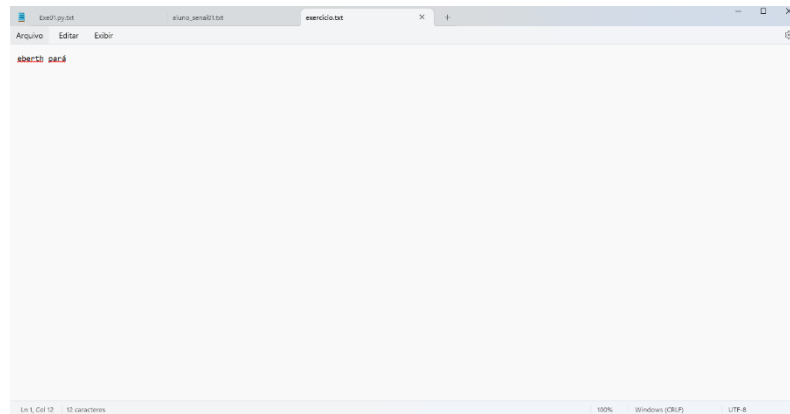

FAZENDO COMMIT E PUSH NO GITHUB DESKTOP

(Fazer um arquivo em texto para a manipulação de commit)

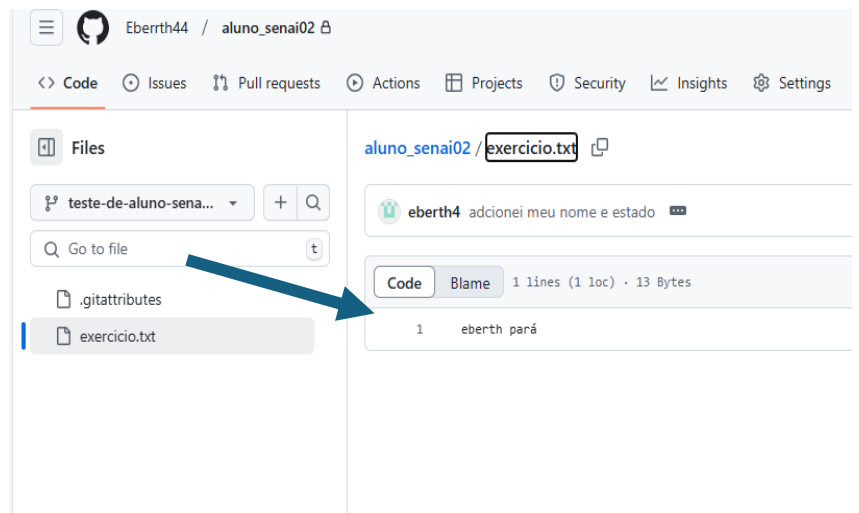

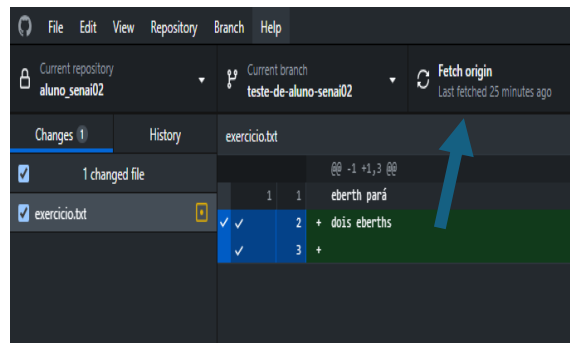

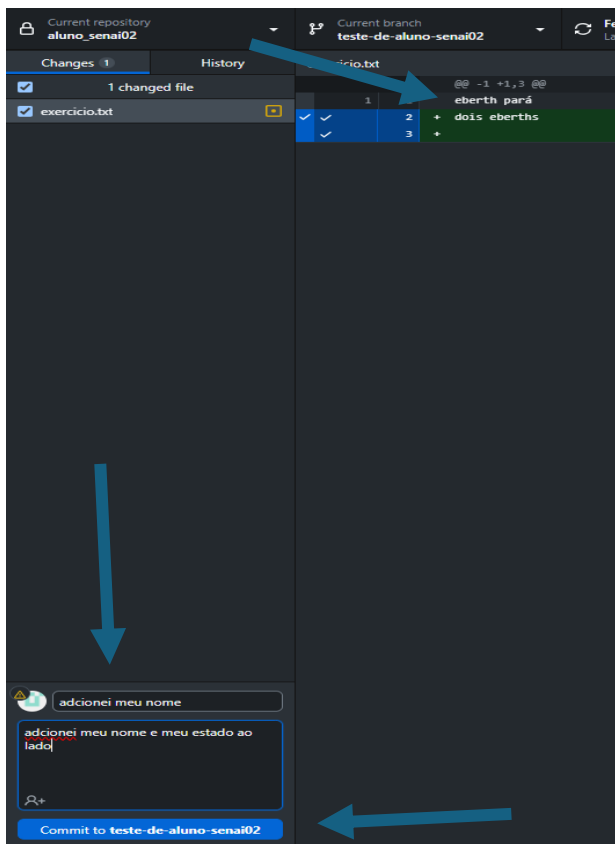

(Digite o que quiser e salve)

FAZENDO COMMIT E PUSH NO GITHUB DESKTOP

1. Após fazer alterações nos arquivos, abra o GitHub Desktop.
2. No painel "Changes", visualize as mudanças feitas.
3. Digite uma mensagem descritiva no campo "Summary".
4. Clique em "Commit to [nome do branch]".
5. Clique em "Push origin" para enviar as alterações para o repositório online.

Alterando um Commit no GitHub Online

1. Acesse o repositório no GitHub Online.
2. Vá até a aba "Commits" para visualizar os commits realizados.
3. Clique no commit que deseja alterar.
4. Para editar um commit recente, faça uma nova alteração no arquivo e utilize a opção "Amend commit".
5. Caso precise reverter um commit, utilize a opção "Revert" disponível no GitHub Online.

The screenshot illustrates the process of amending a commit on GitHub. The top part shows the repository 'aluno_sena02' with a file 'exercicio.txt' being edited. The bottom part shows the 'Commit changes' dialog box with a commit message and an extended description.
